Supplement

Entered as second-class matter April 1, 1924, at the Post Office at Fredericksburg, Va., under Act of August 24, 1912. Acceptance for mailing at special rate of postage provided for in Section 1103, Act of October 3, 1917, authorized December 3, 1938.

Mary Washington College of the University of Virginia

Mary Washington College, the Woman's College of the University of Virginia, is an integral part of the University system and is under direct control of the Rector and Visitors of the University. It is a liberal arts college, and its purpose is to provide for women educational opportunities comparable to those offered men at Charlottesville.

This college draws its students from every state in the Union and from many foreign countries. It is large enough to provide a rich offering of courses but small enough to give personal attention to each student.

The faculty have been carefully selected for their interest in teaching and their scholarship in the field of their specialization. The staff is large enough numerically to insure small classes and individual assistance for students when needed.

The setting, campus, and buildings afford a college environment of unusual beauty and charm. The spacious grounds, containing 381 acres, are situated on the famous Marye's Heights, commanding a panoramic view of the City of Fredericksburg and the Rappahannock River Valley.

Midway between Richmond and Washington, historic Fredericksburg is readily accessible to these cultural centers, which afford a unique opportunity for frequent college-sponsored trips. Known as the boyhood home of George Washington, Fredericksburg is also the seat of the home of his sister; the home and tomb of his mother, Mary Washington; and other historic shrines.

A catalogue giving full information will be sent upon request. Address Director of Admissions, Mary Washington College of the University of Virginia, Fredericksburg, Virginia.

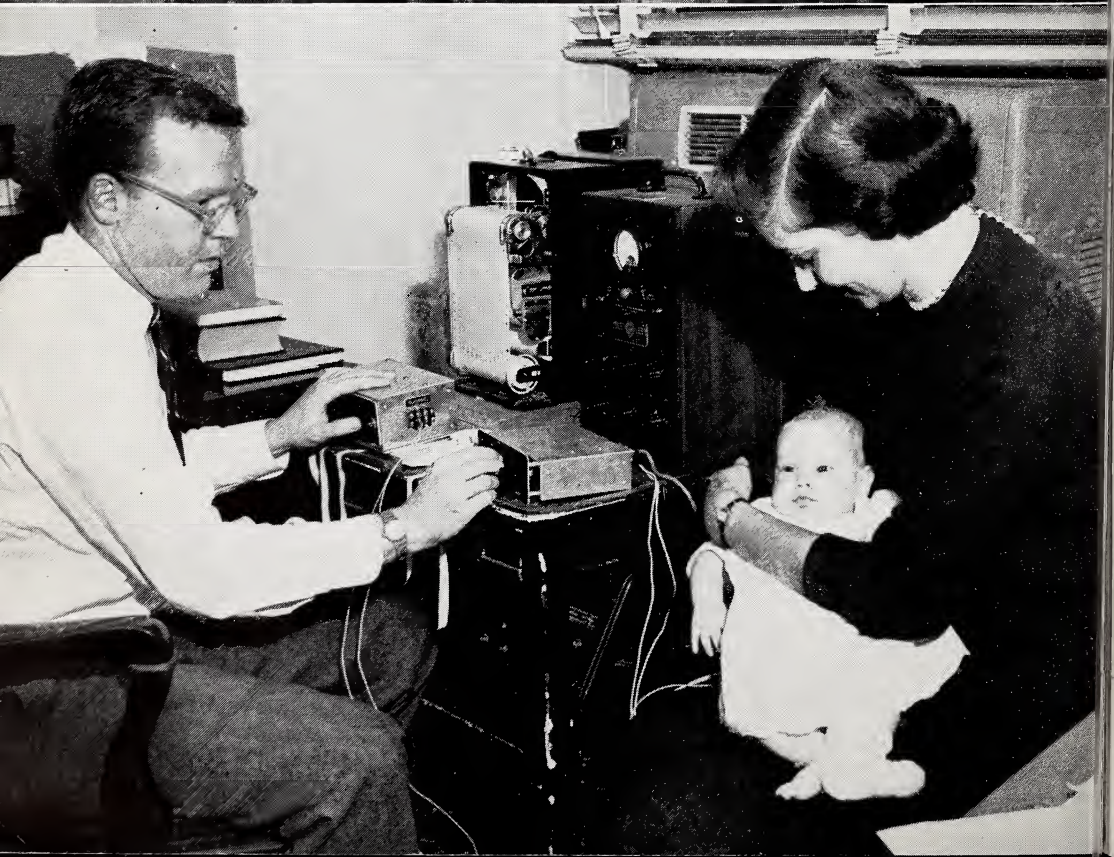

COOPERATIVE PROGRAM IN SPEECH CORRECTION AND AUDIOLOGY

There is an increasing demand for teachers and clinical workers with special training in speech, including speech correction and audiology. To supplement the major program in Dramatic Arts and Speech at Mary Washington College, a cooperative program has been established with the University of Virginia to provide a major program in speech correction and audiology.

This program provides that the first three years of work be taken at Mary Washington College and that the fourth year be spent in residence at the University of Virginia in Charlottesville. Upon completion of the program at the University of Virginia the student receives a Bachelor of Arts degree from Mary Washington College, with a major in speech correction and audiology.

Charges for tuition, room and board, etc., for the three sessions at Mary Washington College are listed in the current catalogue of that institution. The charges for the fourth year when the student is registered and in attendance at the University of Virginia are listed in the catalogue of the College of Arts and Sciences, of the University.

Students interested in the program should apply to the Director of Admissions, Mary Washington College. Requests for further information about the program should be addressed to the Chairman, Department of Speech and Drama, University of Virginia, Charlottesville.

Elective	3
	<hr/> 32

The Speech and Hearing Center at the University of Virginia, completed in 1953, provides the most modern facilities and equipment for diagnosis, therapy, research, testing, and recording. Located in Cabell Hall, the Center is near the University of Virginia Hospital and Medical School, where members of the departments of Otolaryngology, Neurology and Psychiatry, and Pediatrics are available as special consultants for students in speech correction and audiology.

Students in speech correction and audiology work closely with the staff of the Center in all phases of their training. This includes observation of diagnosis and therapy for clinical patients, and participation in field surveys of speech and hearing problems in public schools throughout Virginia. Usually in the second semester of their training, students are assigned cases, under staff supervision, for clinical practice. In addition to work in the Center, students have an opportunity to deal with speech and hearing disorders among children in the public schools of the city and county. Field trips are also regularly made to the Virginia School for the Deaf and Blind, and to other facilities and clinics concerned with speech and hearing problems.
